Purpose Statement

In 2016, providers faced the realities of Comprehensive Care for Joint Replacement (CJR), Pre Claim Reviews (PCR) and progression of value based purchasing models. Even if not directly impacted, the entire industry must pay close attention and begin preparations for the impact of programs such as these on the care delivery model. This session will provide a solid foundation, real life examples and practical strategies for leaders to position their agencies for success both now and in the future.
